A Thoughtfully-Designed, Stylishly-Built & Solar-Powered Ranch with Privacy and Upgrades

The Design:

These sellers thought of everything when designing this home built just four years ago. They worked with an architect to design this smart plan on a private 5+ acre wooded lot which they chose for its ability to face the home "Solar South", its topography to support a walk-out lower level, and its proximity to Saratoga. They chose an award-winning builder, Waldron Builders, to bring their dream home to life complete with the custom-craftsmanship they're known for in Saratoga, like the woodwork and dramatic tray ceilings.
