This is The Perkins floor plan built in 2016. the open concept floor plan is wonderful for entertaining or just to be with your family in one large area. Lots of windows and natural light. A gas log fireplace that has never been used, hardwood floors throughout the main living areas. The formal dining room has a coffered ceiling and wainscoting on the walls and is large enough for a good size dining room suite. So much counter space in the kitchen with an island to sit at in addition to the eat in area between the kitchen and the family room. Stainless steel appliances include the double oven, smooth surface cook top and built in microwave. A walk in pantry is a dream!! the laundry room and book bag/catch all area is between the kitchen and the three car garage. Tile is in the wet areas. The back yard and covered patio is accessed from the kitchen and family room. You will love the open back yard with a play set that will stay if you would like it! A additional living room on the main level could also be a great office space or playroom. On the second floor you will find an oversized master suite with a sitting area. the master bathroom is gorgeous and has separate vanities, a large shower, a soaking tub and a huge walk in closet. Three additional bedrooms include one with an en suite bathroom in addition to another full bathroom. This home is move in ready! Call today to see it for yourself!
